

## Assignment 1: Create a visualization showing Profitability By State

**Data Source:** Data of hypothetical transactions of a sample super store in US for the year 2015

**File:** Excel file named “P1-SuperStoreUS-2015.xlsx”

**Tableau Public URL:** [Profitability By State | Tableau Public](#)

### Inferences:-

1. North Carolina has incurred highest losses followed by Montana. California has reported highest profits, followed by Texas
2. Majority of the States belonging to eastern part of the country reported loss.
3. Majority of the States belonging to western part of the country reported profit.
